Abstract (en)
[origin: WO2017013327A1] The invention relates to a portable device for inflating an envelope comprising at least one inlet (1) for surrounding air, at least one check valve, at least one compressed-gas inlet (2), at least one intake chamber (3), at least one connector, such as an acceleration cone (5) having a longitudinal central axis of symmetry (X, X'), arranged in the extension of at least one intake chamber (3) and connected to at least one inflatable envelope, an intermediate chamber connecting at least one compressed gas inlet (2) to at least one intake chamber (3), while one intermediate chamber and at least one intake chamber (3) are separated by a wall arranged transverse to the axis (X, X') and are connected by at least one orifice located in the transverse wall (8).
