Abstract (en)
[origin: WO2017012809A1] The invention relates to a rotor (10) of an impact crusher, comprising a crushing roll body (12) and at least one holding device (20) attached to the crushing roll body (12) for holding a blow bar (18), wherein the holding device (20) has a guide frame (24) and at least one guide element (26), which is connected to the blow bar (18) and is movably attached to the guide frame (24) in such a way that movement of the guide element (26) in the radial direction in relation to the guide frame (24) results in movement of the blow bar (18) in the radial direction in relation to the crushing roll body (12), wherein the guide element (26) is arranged in such a way that the guide element can be moved in the axial direction in relation to the blow bar (18).
