Abstract (en)

[origin: WO2017012990A1] The invention relates to a vehicle seat (1), in particular a motor vehicle seat, comprising a seat cushion (3) and a backrest (5), and a kinematic arrangement (3a, 5, 11, 13, 21, 27, I, II, III, IV, V, VI, VII) for transferring the vehicle seat (1) from a use position suitable for conveying people into optionally an entry position or a floor position, wherein the kinematic arrangement has a turning-sliding joint (VII) that is active between two transmission members (3a, 21) of the kinematic arrangement during the transfer from the use position into the entry position, and is at least periodically inactive during the transfer from the use position into the floor position.
