Abstract (en)

[origin: WO2017045927A1] The invention relates to an energy supply device (1) for a switch machine (3), which energy supply device is designed to be fed a direct voltage and to provide an alternating voltage suitable for the switch machine (3). According to the invention, in order to be able to produce a railway switch (4) more economically, the energy supply device (1) is designed to control the switch machine (3).
