Abstract (en)
[origin: WO2017013476A1] The invention concerns the ecological fuel additive, composed of triferric tetroxide, nitrates containing 30-60% in weight of triiron tetroxide (Fe₃O₄), 10-30% in weight of potassium nitrate(V) (KNO₃), sodium nitrate (V) (NaNO₃), ammonium nitrate(V) (NH₄NO₃), or mixture of the abovementioned nitrates(V), 5-30% in weight of sodium percarbonate (Na₂CO₃·1.5H₂O₂) and 10% in weight of anti-caking agent. Advantageously, the anti-caking agent is powdered burnt clay and Fe₃O₄ used for production of fuel additive is free from FeSO₄. The solid fuel additive according to the invention is ecological thanks to this that the production of carbon black and toxic compounds present in carbon black is reduced.
