Abstract (en)

[origin: WO2017013241A1] The invention relates to an assembly system (1) for fastening and bearing solar modules (50, 51) on a substructure, comprising at least one longitudinal bearing profile (10) and at least one installation adapter (20) for clamping installation on the longitudinal bearing profile (10), wherein the installation adapter (20) has a clamping section (21) which can be expanded from a clamping position to an installation position, formed from a first limb (22) having a clamping arm (22.1), a second limb (23) having a clamping arm (23.1) and an intermediate section (24) connecting the two limbs (22, 23), and wherein the longitudinal bearing profile (10) forms a profile limb (11) for removable clamping fastening of the installation adapter (20) by means of the clamping section (21).
