Abstract (en)

[origin: WO2017021460A1] The present invention relates to a method for interactively sharing at least one programme and/or at least one piece of data among at least two electronic devices including at least the following steps of: initiating at least one so-called sharing session by means of at least one first electronic device; connecting at least one second electronic device to said one or more open sharing sessions; executing at least one application and/or at least one piece of data and/or at least one interface for controlling at least one peripheral shared in said one or more open sharing sessions; making accessible the control of at least one application and/or at least one piece of data and/or at least one interface for controlling at least one shared peripheral in said one or more sharing sessions opened by each of the electronic devices connected to said sharing session; executing a so-called display module of at least one application and/or at least one piece of data and/or at least one control interface of at least one shared peripheral on each electronic device connected to said one or more sharing sessions; displaying on the screen of each electronic device connected to said one or more sharing sessions the one or more applications and/or the one or more pieces of data and/or the control interface of at least one peripheral shared by at least one of said electronic devices.
