Abstract (en)

[origin: CN108078488A] The invention relates to an accessory (1) of a suction head (100) of a vacuum cleaner, said suction head comprising a suction duct (101) and a sole (102) provided with an outer face and a cavity which communicates with the suction duct. The accessory (1) comprises a plate (2) provided with an inner face, an outer face (4) and a hole which opens on said inner and outer faces. Assembly means (7) of the plate located under the sole of the suction head allow the hole to correspond with the cavity during said assembly. Air channeling means are configured to open upstream on the contour of the plate and downstream on the hole. The invention also relates to a vacuum suction head (100) equipped with such an accessory (1).
