Abstract (en)
[origin: EP3326960A1] The system of baskets is designed to allow operators to easily and safety hook and unhook cargo container on ships and in port, including three baskets (1,1',1''), connected to each other in a manner that baskets (1) and (1') can be folded with respect to the top basket (1''), and where the top basket is attached to the top frame (2) and in turn, the frame is attached to the crane by means of the spreader using container hooks (3). The device incorporates solar panels (5) for electrical power and the bottom basket (1) is accessed through a door (18), while travel between baskets is accomplished using trap doors (20) with automatic closing and locking devices.
