Abstract (en)

There is described a method for contact filling at least one article (2) with a pourable product, comprising the steps of: i) arranging a mouth (3) of article (2) in contact with a filling body (10), which defines a first fluidic line (11) for pourable product; ii) filling article (2), by creating a fluidic connection between first fluidic line (11) and article (2); and iii) measuring the amount of pourable product filling article (2) and interrupting fluidic connection when the measured amount equals a given set-point (Q); the given set-point (Q) being determined on the basis of the format of article (2); iv) estimating a first quantity (V2) associated to the volume of article (2); and v) correcting the given set-point (Q) on the basis of first quantity (V2) before step ii)
