Abstract (en)
An electric wire processing device comprising: - a feed unit (1), - a stripping unit (2) to strip the end of the wire to be processed, - a crimping unit (4) to crimp a terminal onto the stripped end of the wire, - a quality control unit (3), - a storage unit (5), - a transport unit (6) comprising: ## a continuous platform (60), ## a tray (61) to hold the wire to be processed, the said tray (61) being slidable on continuous platform (60), ## a gripping clamp (62) attached to tray (61) to grip the end of the wire to be processed, ## means for moving gripping clamp (62) with respect to tray (61), so configured as to enable the end of the wire to be processed to be inserted into stripping unit (2), quality control unit (3), and crimping unit (4) for processing.
