Abstract (en)

[origin: WO2017017111A1] The invention relates to a device for treating the hair, comprising a first and a second arm (5 and 6) that are able to move relative to one another between a moved-together configuration for treating the hair and a spaced-apart configuration for inserting hair to be treated between said arms, the first arm (5) carrying an applicator member (26) for applying a cosmetic product that is able to come into contact with the hair in the moved-together configuration of the arms (5, 6), and the second arm (6) having at least one housing (38); a pressing element (21) disposed in the housing, the pressing element being configured to press the hair against the applicator member in the moved-together configuration; a comb (13) mounted on the pressing element.
