Abstract (en)

[origin: WO2017016990A1] An adjustable anchoring group for the wall assembly (23) of wall cupboards (P) comprising a hanging-bracket device (12), provided with an anchoring base (16) to a wall (23) and a hooking element (17), and an anchoring support (22, 222) to a wall-cupboard (P), regulation means and activation means of the reciprocal position being provided between the hanging-bracket device (12), the hooking element (17) and the anchoring support (22, 222) in order to regulate the position of the wall cupboard (P) with respect to the wall (23) according to two directions (F, F1) perpendicular to each other, vertically (in height) and horizontally (in depth), respectively, wherein both the regulation means and the activation means are accessible from below by means of holes (43) formed in a base or ledge (44) of the wall cupboard (P).
