Abstract (en)

[origin: WO2017021365A1] Composition for solubilization of organic residues of raw materials of fossil origin comprising a mixture of fatty acid esters of formula R1COOR2 in which R1 represents a linear or branched C5 to C23 carbon-based chain, optionally comprising one or more unsaturations, R2 represents a linear or branched C1 to C10 carbon-based chain, optionally comprising one or more unsaturations; said composition comprising: a) at least 18% by weight of C6 to C10 fatty acid esters, b) at least 18% by weight of C18 to C24, in particular C18 to C22 fatty acid esters, comprising at least one double bond, and the invention also relates to the use of the compositions.
