Abstract (en)

[origin: WO2017017215A1] The invention relates to a method for coating a surface (2) using a coating jet (S) that contains coating particles, said coating jet (S) being directed onto the surface (2) from a spray unit (1) at a spray angle (α), characterised in that said spray angle (α) is determined during the coating process or between two coating processes and in that, when the determined spray angle (α) deviates from a predetermined target spray angle, the spray angle (α) is adjusted and thus readjusted to the target spray angle.
