Abstract (en)
[origin: WO2017021708A2] A separator apparatus (10), such as a separator apparatus for use with an underwater excavation apparatus (5), is configured to receive a mixture of fluid and solids from an underwater excavation apparatus (5). The separator apparatus (10) includes at least one separation arrangement or means. The separation arrangement or means is configured to separate at least a portion or part of the solids from a mixture of fluid and solids passing or flowing in or through the separator apparatus (10).
