Abstract (en)  
An installation frame (100) for a roof window for installation in a roof structure comprising battens (302, 303), said installation frame (100) comprising  
a top part (140), a bottom part (120), and two side parts (130), the side parts (130) being connectable to the top part (140) and bottom part (120) at  
ends thereof to form the installation frame (100) as a rectangular frame. At least one of the side parts (130) is movably connectable to the top part  
(140) and/or the bottom part (120) for said side parts (130) to be shiftable by lateral at least relative movement towards and away from each other for  
said side parts (130) to assume respectively a defined proximal position and a defined distal position relative to each other.
