Abstract (en)
The present invention proposes a latch assembly (10), comprising a housing (30) having a body portion (32); an actuator (20) rotatably mounted in said housing (30), having a range of rotation; and a locking tongue (50) mounted to said actuator (20). said latch assembly (10) further comprises a mounting member (40) having an at least one tooth (41) which protrudes from a hollow body (44) of the mounting member (40) facing to the housing (30); at least one protrusion (43) formed on an inner surface (45) of the mounting member (44) wherein said at least one protrusion (43) is guided on at least one guiding channel (39) formed on the outer periphery of the body portion (32) for attaching said mounting member (40) to the housing (30).
