Abstract (en)

[origin: WO2017021666A1] A protective device (1) comprising: - a shaft (2); - a reinforcement (6) that is fastened to the shaft (2) and is deformable between a folded position and a deployed position; - a canopy (4) comprising at least one panel (5) fastened to the reinforcement (6); - a sleeve (21) secured to one or more panels (5) of the canopy (4), the sleeve (21) being designed so as to be able to be turned back around the canopy (4) when the reinforcement (6) is in the folded position; the protective device (1) comprising: - a means for closing the sleeve (21) once it has been turned back around the canopy (4), the closing means being fastened to at least one panel (5) and to the sleeve (21), the closing means being designed so as to keep the canopy (4) in the sleeve (21), and - at least one means for locking the reinforcement (6) in the folded position.
