Abstract (en)
[origin: WO2017020885A1] Device for transporting a transport item for mounting on a lifting vehicle, in particular on a transporting device of a forklift truck, in particular an order-picked package, in particular with a load weight of less than about 50 kg, comprising a means for at least temporarily receiving the transport item by means of a vacuum device and/or a conveyor belt, wherein the vacuum device is to be positioned substantially in the horizontal onto the transport item, and/or the conveyor belt is to be positioned on a lower edge of the transport item, wherein the vacuum device and/or the conveyor belt is arranged on a pivot arm with a pivot point which, by means of the vacuum device and/or the conveyor belt, allows handling of the transport item, in particular a pivoting, in particular at a predetermined pivot angle, in particular of about +/- 90°, within the horizontal, and/or depositing of the transport item, substantially in the horizontal.
