Abstract (en)

[origin: WO2017021101A1] The present invention relates to a laundry-care appliance (100) having a rotatably mounted washing drum (107) for accommodating laundry, having a tub (109) for accommodating washing detergent, wherein the tub (109) has an outlet opening (113) and an inlet opening (111), and having a circulation system (105), which fluidically connects the outlet opening (113) to the inlet opening (111), wherein the circulation system (105) comprises a pump (117) for pumping washing detergent into the washing drum (107). The pump (117) is designed to pump the washing detergent into the washing drum (107) at different pump pressures, within the same washing operation, so as to vary the location at which the washing detergent enters the rotating washing drum (107).
