Abstract (en)

[origin: WO2017020959A1] The present invention relates to laundry treatment machine such as a laundry washing and/or drying machine comprising a front door having a mechanically improved handle mechanism assembled in an inter-engaged manner. The present invention relates more particularly to a laundry treatment machine comprising a cabinet having a front wall, an upper surface and a main body, a front wall with a front door (19) allowing access into a drum for loading or unloading laundry, the front door (19) being openable by means of a handle assembly (18) mountable to the front door (19), wherein the handle assembly (18) comprises an external handle element (12) and a handle auxiliary element (13) being assembled with each other by means of at least a first connection means (15) and at least a second connection means (16).
