Abstract (en)  
[origin: WO2017023181A1] An alignment assembly includes a base (14) and a support leg extending from the base, the leg configured to support a portion of a turbine system structure. Also included is a first support leg portion (20) disposed on a surface of the base (14) and coupleable thereto. Further included is a second support leg portion (22) angularly oriented relative to the first support leg portion (20) and coupleable to the turbine system structure (10). Yet further included is a jack assembly (24) moveable on the surface of the base (14) and configured to vertically and laterally adjust the turbine.
