Abstract (en)

[origin: WO2017064100A1] A drying and/or curing installation (10) for drying and/or curing painted and/or coated and/or bonded workpieces has a processing chamber (18) for receiving workpieces (14) to be processed, which is connected to a process air line (40, 42, 44, 46, 50) for introducing and/or extracting process air into and/or out of the processing chamber, a heating apparatus (26-37) for heating process air to be introduced into the processing chamber (18), and a control device (55) for controlling the quantity of process air introduced into the processing chamber and/or extracted from the processing chamber and for controlling a heat output of the heating apparatus. The control device (55) is in this case configured such that it sets, controls and/or regulates the quantity of process air and the heat output in a manner dependent on one another or with regard to one another.
