Abstract (en)

[origin: WO2017025230A1] The invention relates to a positioning device for a parallel tester (1), a parallel tester (1) and to a method for testing a printed circuit board. One aspect to the invention relates to fine adjusting a positioning device wherein the test adapter (14) can be secured to an inner holding part (28) of a holding device, and the inner holding part (28) can be moved in relation to the remaining positioning device. Exclusively one or more pivot joints and/or one or more air bearings and/or more magnetic bearings are provided as bearings.
