Abstract (en)
[origin: US2018162583A1] The invention relates to a plastic container with a base and side walls standing on the base, wherein a receiving region of the container is defined by the base and the side walls, wherein the base, on its side facing away from the receiving region, forms a plane, wherein the plane carries an inner region, a bearing rim surrounding the inner region, and first ribs protruding from the plane, wherein the bearing rim has a bearing face for the container and the bearing face is elevated in the direction perpendicular to the plane compared to the inner region, wherein each of the first ribs extends in the direction of the bearing rim starting from the inner region, wherein, with respect to each of the first ribs, the end face of the first rib pointing in the direction of extent leads tangentially into the plane.
