Abstract (en)
[origin: EP3333315A1] The invention relates to a forming section comprising a twin-wire forming unit formed between a lower wire (10) and an upper wire (20), in which first water removal means of the twin-wire forming unit is a forming roll (13) with a wrap angle (13V). In the twin-wire forming unit following the forming roll (13) is a sleeve roll (50) and that run between the forming roll (13) and the sleeve roll (50) is free of vacuumed dewatering i.e. between the forming roll (13) and the sleeve roll (50) no vacuumed dewatering is located.
