Abstract (en)

[origin: EP3335863A1] The present invention relates to a Three-Dimensional (3D) printing data generation method and device. The method is applied to small glasses, and includes: an object to be scanned is recognized; the object to be scanned is scanned to obtain a scanning result; 3D printing data is generated according to the scanning result; and the 3D printing data is sent, according to a selected operation item, to an operating device corresponding to the operation item.
