Abstract (en)
[origin: WO2017029015A1] The invention relates to a cosmetic agent for dyeing keratin fibers, in particular human hair, containing at least one specific hydroxy-terminated, amine-functionalised silicone polymer and at least one oxidation dye precursor and/or a direct dye, wherein the use of the at least one hydroxy-terminated amine-functionalised silicone polymer leads to improved care of the keratin fibers together with extremely low color shift. The invention further relates to a corresponding packaging unit (kit of parts) and to a method for dyeing keratin fibers. Finally, the invention relates to the use of the claimed cosmetic agent and to the claimed packaging unit.
