Abstract (en)  
[origin: WO2017030514A2] The present invention relates to a swallowing exercise apparatus (1) which is used for treating patients with swallowing disorder or impaired saliva control. The inventive swallowing exercise apparatus (1) can be manufactured with a low cost and it has a quite simple structure with no complex structure. The said swallowing exercise apparatus (1) increases number of swallow by forcing a patient to swallow depending on his/her head movements.
