Abstract (en)

[origin: WO2017028845A1] The invention relates to a suitcase (1) for stacking with a further suitcase (1a), comprising a contact surface (13) for stacking the further suitcase (1a), at least one coupling part (10, 11) which can be brought together with a matching coupling part (28a, 29a) of the further suitcase (1a) to form a plug-in connection, wherein the coupling part (10, 11) is aligned such that the plug-in connection to the matching coupling part (28a, 29a) is formed by displacing the further suitcase (1a) along the contact surface (13). At least one locking element (18, 38) is provided to secure the plug-in connection against being released, wherein the locking element (18, 30) can be displaced from an initial position (A) to an intermediate or end position, and in the initial position (A) is in a receiving region (8) for the additional suitcase (1a), which is used when placing the further suitcase (1a) on the contact surface (13). The invention further relates to an arrangement comprising at least two suitcases (1, 1a) stacked one above the other and a method for stacking at least two suitcases (1, 1a).
