Abstract (en)
[origin: WO2017028937A1] The invention relates to a system for the diagnosis of braking systems, comprising a control device (11) for generating signal codes as a function of defects of the braking system and with an optical or acoustic signal transmitter for outputting the signal codes. According to the invention, a mobile reading and display device is provided for reading the signal codes, for combining the signal codes with additional information and for displaying the information.
