Abstract (en)
[origin: WO2017032933A1] The present invention concerns a cable (1) comprising one or more elongate conductive elements (11), said elongate conductive element or the set of said elongate conductive elements (11) being surrounded by a protective sheath (20), characterised in that the outer surface and/or the inner surface of the protective sheath comprises at least one longitudinal groove (21) in which there is positioned at least one longitudinal reflective element (30) obtained from a first composition comprising a first polymer material and at least one reflective filler.
