Abstract (en)

A tamper-evident single-use container for holding unitary doses, especially solid pharmaceutical products, comprises a container body (12) made of a plastic material with a bottom end (14) and a tubular top end (16); and a head section (18) closing the top end (16); wherein the head section (18) is integrally connected to the container body (12) at a connecting region (20); and wherein the thickness of the plastic material at the connecting region (20) is reduced by at least 50% as compared to the wall thickness of the container body (12).
