Abstract (en)

[origin: WO2012062381A1] An auxiliary transport unit (1) according to the invention is provided in particular for pallets, wherein the pallets comprise a loading base which during transport is oriented substantially horizontally. The auxiliary transport unit is characterised by a supporting device (3) which during transport extends substantially in the vertical direction. The auxiliary transport unit also comprises a connecting device (4, 4a, 4b) which connects the supporting device to at least one first, lower pallet. The auxiliary transport unit also has a holding device (5, 16) which is connected to the supporting device. The holding device is provided in order to hold at least one second pallet vertically spaced from the at least one first pallet.
