Abstract (en)
A refrigerator includes doors laterally disposed in an upper portion of the refrigerator, a rotary partition body disposed in any one of the doors and having a dew condensation prevention heater, temperature sensor (171), humidity sensor (144), and a control unit that controls power supply to the dew condensation prevention heater, based on an input from temperature sensor (171) and humidity sensor (144). Temperature sensor (171) and humidity sensor (144) are disposed so as to be covered by hinge cover (141) which covers a hinge of the other door.
