Abstract (en)
[origin: WO2017032663A1] The invention relates to an edge shuttering device which is used for the production of plate-shaped precast concrete parts (10), comprising base shuttering elements (22), which can be fixed on a forming table (24) and have a form panel (26) and a rear panel (28) which is directed away therefrom, and additional shuttering elements (30) which are aligned in parallel to the base shuttering elements (22) aligned and are attached thereon. According to the invention, it is provided that the additional shuttering elements (30) are horizontally adjustable at right angles to the base shuttering elements (22), for which purpose they can be displaced on rails (36), which project from the rear panel (28) of the base shuttering elements (22).
