Abstract (en)
[origin: WO2016203034A1] The invention relates to a ladder top securing system (1) for securing a ladder having rungs and struts to a roof gutter, comprising a ladder attachment device (2) which can be attached to a rung, an insertion device (3) for inserting into the water-carrying section of a roof gutter, and an actuating device (4) which connects the ladder attachment device (2) to the insertion device (3), the actuating device (4) comprising a displacement guide (5) for relative displacement of the insertion device (3) with respect to the ladder attachment device (2). The invention further relates to a method for securing a ladder.
