Abstract (en)
[origin: WO2017037112A1] This invention relates to a low calorie frozen unaerated confection. In a first aspect of the invention, a frozen unaerated confection is provided, the frozen unaerated confection comprising: (a) A mixture of non-digestible, non-flatous polysaccharide and digestible polysaccharide with a total energy content ≤ 3.5 KCal/g; (b) A mixture of non-digestible, non-laxative, mono- or di-saccharide and digestible mono- or di-saccharide with a total energy content ≤ 3.5 KCal/g; (c) 0.2-0.8, preferably 0.2-0.5, most preferably 0.2-0.4 % w/w stabiliser; (d) Sufficient intense sweetener to bring R of the frozen unaerated confection to 0.11-0.32, preferably 0.14-0.28; wherein the frozen unaerated confection has a total energy content of ≤ 100 , preferably ≤ 80 , most preferably ≤ 70 kcal/100 g, wherein the frozen unaerated confection has an ice content at -18 degrees centigrade of 58- 80, preferably 60-75 %, wherein the frozen unaerated confection comprises no more than 5 % w/w non-digestible mono- and/or di-saccharide, and wherein the frozen unaerated confection comprises no more than 15 % w/w non-digestible polysaccharide.
