Abstract (en)  
[origin: WO2017036869A1] The present invention relates to a deformable air guide, suitable for being positioned between at least one air intake of the front end of a motor vehicle and a front-end module of said motor vehicle, said deformable air guide including a body comprising a first end, suitable for being connected to said at least one air intake, and a second end, suitable for being connected to said front-end module, said deformable air guide being capable of deforming during an impact, from a first configuration to a second configuration; the distance between the first and second ends of said body in said second configuration being reduced relative to the distance between the first and second ends of said body in said first configuration.
