Abstract (en)

[origin: WO2017036680A1] The invention relates to a device (12, 12') for drying packagings (1, 1'), in particular composite packagings for foods, comprising: a conveyor belt (13, 13') having cells (14, 14') for holding the packagings (1, 1') and at least one drying apparatus (15) for drying the packagings (1, 1'). In order to achieve especially efficient drying of the packagings, the drying apparatus (15), according to the invention, has at least one contact element (16) having at least one contact surface (20, 20A, 20B). The invention further relates to the use of such a device (12, 12') to dry packagings (1, 1') filled with foods, to a method for drying packagings (1, 1'), and to a packaging (1, 1') for foods.
