Abstract (en)
[origin: WO2017037273A1] The invention relates to an embossing device (4) and to an embossing method for a material web (2) of a textile fibrous material, in particular a fiber non-woven, comprising an embossing tool (5) which embosses and optionally perforates the material web (2) with fluidic negative pressure and/or fluidic overpressure. The embossing tool (5) has an embossing body (7) with a perforated body shell (9), the web material (2) resting on said body shell.
