Abstract (en)
[origin: WO2018050285A1] The invention relates to sanitary unit (1, 116, 118) which has a sleeve-like outlet mouthpiece (2), which (2) can be installed on a water outlet of a sanitary outlet fitting and has a sleeve interior, into which is inserted a sanitary functional unit (5) with at least one functional element (5), which (5) has a component (6), which (6) can be adjusted between at least two functional positions, by means of an externally accessible handle, via a transmission element (9) which is guided in an axially displaceable manner in the functional element (5). The sanitary unit according to the invention is characterized in that the handle is configured in the form of an actuating element (7) which is retained in a displaceable manner on the outer circumference of a sub-region, forming part of the outlet mouthpiece (2), which projects beyond the water outlet of the outlet fitting, and in that the actuating element (7), which serves as a handle, has retained on it a water-jet-permeable or water-jet-guiding outlet structure (8), which connects the actuating element (7) to the transmission element (9).
