Abstract (en)

[origin: WO2017036678A1] The invention relates to a hinge-sided finger protection device for a wing door, comprising at least a protective profile (1) and at least a fastening means (3) for fastening the protective profile (1) to a door frame (R) of the wing door. The protective profile (1) can be plugged onto the fastening means (3), wherein the protective profile (1) accommodates in itself the fastening means (3) in the plugged-on state. The protective profile (1) is non-destructively removable from the fastening means (3) and can be again plugged thereon. The at least one fastening means is preferably a clip (3).
