Abstract (en)

[origin: WO2017036872A1] The invention relates to a heating block half-shell (10a, 10b) and a heating block (10) for a flow heater, which each have a (partial) wall (17) for a heating channel (18) with at least one straight section. In the at least one straight section, at least two guide elements (11a, 11b, 12, 13a, 13b, 14, 15a, 16) are arranged on the wall (17), behind one another in an axial direction (L), and each of which are designed to support a heating coil (20) in the radial direction in the heating channel (18). The invention also relates to a flow heater having a heating block of this type.
