Abstract (en)
[origin: WO2017036447A1] The invention relates to a holding frame (1) into which plug-in connector modules (19) are insertable, wherein the holding frame (1) consists of two interconnectable halves (4, 5), a first half (4) and a second half (5), wherein the holding frame (1) has at least one first locking element (7), and wherein the halves (4, 5) are alignable and fixable in at least two positions with respect to each other via the first locking element (7). The first locking element (7) is fastened under prestress to the halves (4, 5) and the prestress causes the exertion of a force which fixes the holding frame (1) either in an open position or in a closed position.
