Abstract (en)

[origin: WO2017040092A1] Certain aspects of the present disclosure relate to method and apparatus for wireless communication. In certain aspects, the method generally includes transmitting first control information during a first transmission time interval (TTI), wherein the first control information indicates resources within a TTI allocated for a data transmission, and transmitting the data using the indicated resources. The method further includes transmitting second control information, wherein the second control information also indicates the resources for the data transmission.
