Abstract (en)

[origin: WO2017050415A1] The invention relates to a method for managing a plurality of subscription profiles (18a, 18b) on a security element (14) of a mobile terminal, wherein the subscription profiles comprise at least one standard subscription profile (18a) for registering the security element in a mobile radio network and for using services of said mobile radio network, and at least one eCall subscription profile (18b) dependent on the country of stay.
