Abstract (en)
[origin: EP3346071A1] Disclosed is a window assembly (1) for being mounted in a roof (3) or a ceiling of a building. The window assembly (1) comprises a window (5) including a window frame (2) arranged to be fixed to the roof (3) or the ceiling of the building. The window frame (2) is arranged to suspend a window pane (4), wherein the window pane (4) comprises an outside surface (6) arranged to face away from the building and an inside surface (7) arranged to face the internal of the building. The window assembly (1) further comprises an at least partly transparent window covering device (8) arranged to cover the outside surface, wherein the window covering device (8) comprises an outside surface (9) arranged to face away from the window (5) and an inside surface (10) arranged to face towards the window (5). The window assembly (1) is characterized in that the window assembly (1) comprises at least one at least partly transparent light emitting panel (11) arranged between the outside surface (6) of the window pane (4) and the inside surface (10) of the window covering device (8).
