Abstract (en)
[origin: WO2017025652A1] The invention relates to an awning structure comprising: an assembly provided with shading elements; a substructure for supporting the shading elements that is provided with a rear profile intended to be secured to a wall or to pillars and comprises means for securing the rear profile to the wall or to the pillars. The securing means comprise plates for securing the assembly to a wall or to pillars, which plates are provided with a securing hook oriented upwards, the rear profile being provided with a part having a shape complementary to the securing hooks, such that the securing plates can be situated at various points of the rear profile.
